

NO BOUNDARIES TO THE BOUNDARY WATERS

Are you eager to have your students work together on hands-on activities?

Our No Boundaries to the Boundary Waters program brings virtual and in-person resources right to your classroom. Some of our partners even incorporate a weeklong trip to the Boundary Waters through our unique scholarship program.

Our 6-12 grade, standards-aligned curriculum fills crucial STEM needs, inspires kids to get outside, and emphasizes multicultural perspectives.

Here's what educators who joined the No Boundaries network have to say:

100%

Would recommend the program to other teachers

100%

Believe the program helped students learn more about nature and understand the impact humans have on the natural world

90%

Indicated that programs were inclusive to students from a wide variety of cultural backgrounds and experience outdoors

90%

Believed their students were more likely to spend time outdoors as a result of this program

No Boundaries Components:

ONLINE

CLASSROOM

EXPERT PRESENTATIONS

WILDERNESS CANOE TRIPS

“Students had lots of questions about the Boundary Waters and were able to make great connections with the biomes they see around them. It sparked an interest in the students to want to visit the Boundary Waters and share their experiences with the outdoors. As a teacher, the online content is easy to use and engaging. And we are so looking forward to our school visit later in the year!”

- Heather Gavrish, 6-8th grade science
